The East Texas Show Star series Clinic and Prospect Shows are intended to provide an educational opportunity for 4-H and FFA members participating in the livestock project area. The main purpose is to teach the basic principles of livestock management as they relate to facility maintenance, selection, nutrition, animal health, handling, showmanship and transportation.

"Quality Counts" programs are discussed to ensure the safe and legal use of drugs or medications to facilitate the ethical care, development and exhibition of livestock. Computers will be available on-site for Quality Counts certification.

Youth participating in this two day clinic and prospect shows will have the opportunity to have their animals in the show ring continuously providing as much hands-on learning as possible. The youth will also get the opportunity to learn from top industry leaders from across Texas in the beef cattle, goat and lamb show world. Every youth will leave this clinic with hands-on learning while being rewarded with prizes and items they can use with their livestock projects at home.
